

We turn business friction into working AI systems.

AKAI is a Dubai-based artificial-intelligence consultancy. We go inside your operation, find what is slow, manual, or costly — and rebuild it with intelligent systems that pay for themselves.

Office

Dubai · United Arab Emirates
Serving the UAE, GCC & international

An AI consultancy built to operate, not to advise.

Most firms hand you a slide deck. We hand you a system that runs — engineered, integrated, and earning from day one.

AKAI is a Dubai-based AI consultancy backed by a Qatar family office. Behind us is a team of developers and AI engineers who design, build, and ship intelligent systems for businesses across the UAE, the GCC, and beyond.

We don't sell software off a shelf. We embed in your operation, learn how it really works, and find the points where time, money, and information leak out — the manual tasks, the scattered spreadsheets, the decisions made a week too late.

Then we fix them. We design the smallest, sharpest system that removes the most friction, build it around the tools you already use, and stay with it until the returns compound. Patient backing means we build for the long term — not the next invoice.

& INTERNATIONAL
REACH

Four steps from friction to system.

A disciplined method that works the same whether we're automating a back office or building an analytics engine — find the leak, design the fix, ship it, and make it pay.

01

Diagnose

We embed in your operation and map every manual workflow, bottleneck, and unused data source — then rank the opportunities by return on investment.

02

Design

We architect the smallest system that removes the most friction, designed around the platforms and people you already work with.

03

Deploy

We build, integrate, and ship working software — not prototypes — and train your team until they trust it and use it daily.

04

Optimize

We measure the impact, tune the models, and expand the system as the gains compound and new opportunities surface.

Capabilities.

Ten ways we remove cost and create leverage. Most engagements combine a few.

01 AI Process & Automation Audit

We map your manual workflows and surface a ranked list of automation opportunities with projected ROI.

03 Custom AI Agents & Assistants

Private, domain-trained assistants that answer questions, draft work, and act inside your own systems.

05 Data & Lead Intelligence

Enrichment, sourcing, and scoring systems that surface the right customers, candidates, or deals.

07 Systems Integration

We connect the platforms you already run on so data moves on its own — no one copying between tools.

09 Web & Product Engineering

Premium websites and web applications, designed and engineered in-house to a high standard.

02 Workflow Automation

We remove repetitive operational work — quoting, data entry, scheduling, reporting — with reliable automated pipelines.

04 Business Intelligence Dashboards

Live operational and financial dashboards that turn scattered data into decisions you can act on today.

06 AI Outreach & Sales Systems

Multi-channel prospecting and personalized outreach that keeps the pipeline full without manual effort.

08 Document & Reporting Automation

Briefings, reports, and documents generated, branded, and delivered automatically on schedule.

10 AI Strategy & Advisory

Ongoing strategy, model selection, and a roadmap that keeps you ahead — available on retainer.

Industries we serve.

SELECTED CLIENTS

Auto Service Vali · Dr. Cem Smile Design · Angel by Vjosa · Zana Agani ·
Burger King · Alexander Chapman · Rent a Car Prishtina · SELLMA

Selected projects.

A cross-section of systems we've designed and shipped — from analytics engines to live operational tools.

Angel by Vjosa ★

BEAUTY & WELLNESS

A unified business-intelligence console that merges accounting and booking data into one AI-assisted dashboard — per-staff revenue, inventory, client segmentation, and a natural-language analytics assistant — paired with a cinematic brand website.

Auto Service Vali

AUTOMOTIVE

A live parts-inventory system for a Land Rover dealership: instant part search, one-click sell, and real-time stock synchronisation — in daily use by the team.

Dr. Cem Smile Design

DENTAL · MEDICAL TOURISM

A premium clinic website built around a cinematic scroll experience, multilingual SEO, and automated consultation capture for international patients.

Zana Agani

DENTAL

A high-end clinic website built around a photo-walkthrough scroll hero, fully bilingual, with automated booking enquiries.

Burger King

F&B · FRANCHISE

An AI data-analyst for a national franchise operator: automated daily performance reporting, cross-location anomaly detection, and a bilingual AI chat dashboard for owners and managers.

Alexander Chapman

RECRUITMENT & HR

An AI recruitment-intelligence platform for a global recruitment firm: candidate sourcing, AI fit-scoring, applicant-tracking write-back, and team analytics.

Selected projects.

Rent a Car Prishtina

MOBILITY

A fleet operations console for a ~1,000-vehicle rental group operating across four international airports: live KPIs, an interactive globe, and a future-availability booking engine.

Prospector

MARKETING & MEDIA

A multi-platform creator-prospecting and outreach agent for a production agency: AI discovery, fit-scoring, and personalized outreach drafted at scale.

Swiss Property Intelligence

REAL ESTATE

An off-market real-estate intelligence and deal-flow system: public-data signals, parcel-level intelligence, and opportunity scoring for the Swiss market.

Destination Discovery Platform

TRAVEL & TOURISM

A curated destination-discovery app for an emerging travel market, with a B2B listings model and a built-in referral engine.

SELLMA

BEAUTY · DIGITAL PRODUCTS

A full online-course and digital-product launch system for a major beauty brand: funnel, platform, payments, private community, and marketing.

Eleven systems, eight industries — one method behind all of them.

Works with the systems you already run on.

We don't ask you to rip out your stack. We plug intelligence into the platforms your business already lives in — across ERP, accounting, CRM, POS, e-commerce, booking, HR, and payments.

ERP & ACCOUNTING

QuickBooks	Xero	Oracle NetSuite	SAP S/4HANA	SAP Business One		
Microsoft Dynamics 365	Sage	Zoho Books	Odoo	Tally	Wafeq	PANTHEON

CRM & SALES

Salesforce	HubSpot	Zoho CRM	Microsoft Dynamics	Freshworks	Pipedrive
Vincere					

POS · RETAIL · RESTAURANT

Square	Toast	Clover	Lightspeed	Foodics	Oracle MICROS · Symphony
--------	-------	--------	------------	---------	--------------------------

E-COMMERCE · BOOKING · HOSPITALITY

Shopify	WooCommerce	Adobe Commerce	Salla	Calendly	Fresha	OpenTable
Opera PMS	Mews					

HR · PAYROLL · PAYMENTS

BambooHR	Workday	Bayzat	Gusto	ADP	Stripe	PayPal	Tap	PayTabs
Network International								

...and 100+ more, connected via API. · Built on best-in-class AI, including **Anthropic's Claude**.

Engagement models.

Four ways to start, scaled to the size of the opportunity.

01 The Audit

A fixed-scope diagnostic. We map your operation and deliver a prioritized automation roadmap with projected ROI — and credit it toward the build if you proceed.

02 The Build

A defined project with a fixed deliverable and timeline. We design, build, integrate, and hand over a working system that you own.

03 The Retainer

Ongoing development, monitoring, and strategy. Your AI engineering team on call, expanding the systems month over month.

04 Performance Partnership

For the right engagements, we tie part of our fee to the measurable value the system creates. We win when you do.

HOW IT WORKS

You provide the access and context. We provide the team, the engineering, and the systems. Most first systems ship in weeks, not months.

What makes us different.

01 We build, we don't just advise.

You get working systems in production — not a slide deck and an invoice.

03 Built on the best AI.

We work with the most capable models available, including Anthropic's Claude.

05 Weeks, not months.

Lean systems that ship fast and prove their value before the budget grows.

02 Backed and resourced.

A full team of developers and AI engineers, supported by a Qatar family office.

04 We meet your stack.

We integrate with the platforms you already run on, rather than forcing a rebuild.

06 Honest about ROI.

We only build what pays for itself — and we tell you plainly when something won't.

A senior team and patient capital.

AKAI is led by its founders and powered by a team of developers and AI engineers — and we are backed by a Qatar-based family office. That means we build for the long term, not the next invoice.

Our base in Dubai puts us in the centre of one of the world's fastest-moving business markets — a short reach to clients across the UAE and the wider GCC, and a launchpad for international work.

The combination is deliberate: senior engineering talent to do the work, patient capital behind us to do it properly, and a region full of ambitious businesses ready to move faster.
